Terra Website and Socials

[Website](#): the official Terraform Labs website

[Docs](#): the official documentation for the Terra blockchain

[White Paper](#): the official Terra White Paper

[Github](#): the official Terraform Labs GitHub hosting all Terra public repos

[Discord](#): the official Terra Discord for developers and enthusiasts to engage in focused discussions

[Telegram](#): the official Terra Telegram for enthusiasts to engage in discussions

[Telegram Announcements](#): the official Telegram announcement channel for all major Terra & Mirror updates

[Twitter](#): the official Terra Twitter for all major news and updates regarding Terra and its ecosystem

[Forum](#): the official Terra Forum for technical discussions related to Terra and its community

[Medium](#): the official Terra Medium for all major partnership announcements and monthly ecosystem updates

[Youtube](#): the official Terra Youtube for Terra panel discussions and monthly AMAs

[Blockfolio Signals](#): Terra announcement channel on Blockfolio

[Reddit](#): the community-run Terra Reddit

[LunaLoot](#): the official Terra merch shop

Mirror Website and Socials

[Website](#): the official Mirror Protocol landing page

[Terra-side](#): the official Mirror Protocol on Terra

[Eth-side](#): the official Mirror Protocol UI bridge to Ethereum

[Docs](#): the official documentation for Mirror Protocol

[White Paper](#): the official Mirror Protocol White Paper

[Github](#): the official Mirror Protocol GitHub hosting all Mirror public repos

[Discord](#): the official Mirror Discord for developers and enthusiasts to engage in focused discussions

[Telegram](#): the official Mirror Telegram for enthusiasts to engage in discussions

[Twitter](#): the official Mirror Twitter for all major news and updates regarding Mirror and its ecosystem

[Forum](#): the official Mirror Forum for technical discussions related to Mirror iterations

[Medium](#): the official Mirror Medium for all major partnership announcements and monthly ecosystem updates

[Youtube](#): the official Mirror Youtube for Mirror panel discussions and monthly AMAs

Anchor Website and Socials

[Website](#): the official Anchor Protocol landing page

[Web App](#): the official Anchor Protocol web application

[Docs](#): the official documentation for Anchor Protocol

[White Paper](#): the official Anchor Protocol White Paper

[Github](#): the official Anchor Protocol GitHub hosting all Anchor public repos

[Discord](#): the official Anchor Discord for developers and enthusiasts to engage in focused discussions

[Telegram](#): the official Anchor Telegram for enthusiasts to engage in discussions

[Twitter](#): the official Anchor Twitter for all major news and updates regarding Anchor and its ecosystem

[Forum](#): the official Anchor Forum for technical discussions related to Anchor iterations

[Medium](#): the official Anchor Medium for all major partnership announcements and monthly ecosystem updates

Analytics

[Chaiscan](#): provides CHAI daily & monthly users and transaction numbers (by DSRV)

[Flipside Crypto](#): provides insights into Terra's ecosystem, including ecosystem usage, stakeholder behaviors, staking patterns, and economics

[Smartstake](#): provides data on staking APR and MIR airdrops

[Megastake](#): provides a list of the top LUNA wallets

[Dapp.com](#): provides data on Terra dapps and rankings

[Blocktivity](#): provides Terra price history, ecosystem and activity data

[Messari](#): provides Terra project overview, news & research, historical data, and metrics

[Token Terminal](#): provides data on Terra P/S, VOL/MC, GMV & rankings with other blockchains

[Token Terminal Mirror](#): provides data on Mirror P/S, VOL/MC, GMV & rankings with other dapps

[AssetDash](#): ranks LUNA with other assets

[Luna Whale](#): provides insights into LUNA whale activity (by DSRV)

[TerraSwap Dashboard](#): provides insights on volume and liquidity on TerraSwap, Terra's AMM DEX

[Mirror Market](#): provides tracking and data insights on the Mirror ecosystem

[Anchor Simulator](#): enables users to estimate earnings on Anchor using different strategies

[Ape Board](#): enables users to track portfolio across the entire Terra ecosystem on one dashboard

Applications

[Mirror Protocol](#): a DeFi protocol that enables the creation of synthetic assets

[Anchor Protocol](#): a high-yield savings protocol

[CHAI](#): a payments product used by 5% of the population in South Korea

[BuzLink](#): a viral marketing product to scale social referrals

[MemePay](#): a payments product used by 3% of the population in Mongolia

[Pylon Protocol](#): A suite of savings and payments products powered by yield redirection

Applications Powered By Terra

[PayWithTerra](#): an API gateway enabling merchants to accept Terra stablecoins

[Kash](#): Intellabridge's decentralized mobile banking app (Alpha release) providing a user-friendly interface to access Mirror and Anchor

[LoTerra](#): decentralized lottery

[Alice Finance](#): front-end interface for the Terra product suite

[Spar Protocol](#): decentralized on-chain asset management protocol

Block Explorers

[Terra Finder](#): the official Terra block explorer

[Stake ID](#): Terra block explorer with additional data on the latest proposals and validators

[Figment Hubble](#): Terra block explorer with advanced validator data and income report functionality

[Terrascope](#): Terra block explorer with community driven features

[ATOMScan](#): Terra block explorer by ATOMScan

Contribute

[Bug Bounty](#): the official Terra Bug Bounty program

[Project Surge](#): program involving community in Terra's BD pipeline

[Terraform Capital](#): launch capital program funding audits for projects that incorporate LUNA/Terra stablecoins

Ecosystem Partnerships

[Terra Bridge](#): Terra bridge web frontend to easily send Terra assets to and from Ethereum and Binance Smart Chain

[Shuttle](#): Terra bridge to Ethereum and Binance Smart Chain

[Wormhole](#): a bridge between Terra, Ethereum, and Solana being developed by Certus One

[Axelar](#): a bridge between Terra and other supported Layer 1 blockchains

[Injective Protocol](#): decentralized derivatives trading using mirror assets

[Intellabridge](#): decentralized mobile banking app "Kash" bringing Mirror and Anchor to mainstream audiences

[Loop Finance](#): AMM DEX on Terra listing native Terra assets, ERC-20 tokens, and SPL tokens

Ethereum

- [Uniswap](#): DEX for Terra assets and MIR-incentivized liquidity pools
- [Sushiswap](#): DEX for Terra assets and SUSHI-incentivized UST Onsen pool
- [Curve](#): Deep liquidity stablecoin pool for UST
- [Balancer](#): UST/USDC pool
- [1inch](#): DEX aggregator for Terra assets
- [Matcha.xyz](#): DEX aggregator for Terra assets
- [Yearn Finance](#): crvUST vault
- [Harvest Finance](#): automated yield-farming for mAsset and UST pools
- [Zapper.fi](#): DeFi dashboard for managing UST
- [Lido](#) - liquid staking derivatives
- [Persistence](#): Terra stablecoin-powered institutional DeFi
- [Unilend](#) - lending and borrowing using mirror assets
- [CREAM Finance](#) - lending and borrowing for UST
- [Stabilize Protocol](#): STBZ-incentivized UST stablecoin pool
- [Pickle Finance](#): incentivized UST/MIR pool
- [Set Protocol](#): FAANG index set of 5 mAssets (Facebook, Amazon, Apple, Netflix & Google) on Uniswap
- [Ren Protocol](#): renVM bridge to transport \$renLUNA to Ethereum

Binance Smart Chain

- [PancakeSwap](#): DEX for Terra assets and CAKE-incentivized liquidity pools
- [StableXSwap](#): stablecoin pool for UST
- [Beefy Finance](#): yield farming optimizer for UST and mAsset pools
- [Smoothy Finance](#): stablecoin AMM for UST
- [Acryptos](#): yield farming optimizer for UST and MIR pools

Educational

[Terra Academy](#): comprehensive introduction to Terra App development

[CoinMarketCap Earn](#): video series explaining Terra stablecoins and LUNA

[Staking Guide](#): guide to staking LUNA on Terra Station

[Developer Docs](#): official documentation for Terra

[Figment Learn](#): tutorials onboarding developers on Terra

[Terra Bites](#): podcast dedicated to the Terra ecosystem

Exchanges

[Binance](#)

[Huobi](#)

[Kucoin](#)

[Bithumb](#)

[Upbit](#)

[Bittrex](#)

[Coinone](#)

[OKEX](#)

[Voyager](#)

[Coinlist](#)

[Bitfinex](#)

[Crypto.com](#)

Infrastructure

[HexTrust](#): Custody support for Terra assets

[PrimeTrust](#): Financial infrastructure for Terra applications

[Fireblocks](#): MPC wallet for Terra assets

[MoonPay](#): fiat to crypto on and offramps

[Simplex](#): fiat to crypto onramps

[Transak](#): fiat to crypto on and offramps

[Switchchain](#): crypto to crypto on and offramps

[Mask Network](#): send and receive cryptocurrencies on social networks

[Band Protocol](#): cross-chain data oracle for mirror assets

[Hummingbot](#): automated crypto arbitrage and trading bots for Terra assets

[Velo Protocol](#): stablecoin swaps using Velo's federated credit exchange network

[Datahub](#): full node infrastructure for Terra developers

[Quicksync](#): data backup solution for anyone running a node on Terra

[Bison Trails](#): platform to optimize running a node on Terra

Support

[Terra public FCD](#): the full client daemon for Terra

[Terra public LCD](#): the light client daemon for Terra

[Easy2stake public LCD](#): the easy2stake light client daemon for Terra

[RPC endpoints](#): a list of recommended RPC endpoints

Wallets

[Terra Station](#): Terra's native wallet

Terra Station Extension: [Chrome](#)

Terra Station Desktop: [MacOS](#) | [Windows](#) | [Linux \(deb\)](#) | [Linux \(rpm\)](#)

Terra Station Mobile: [iOS](#) | [Android](#)

[Mirror Wallet](#): Invest and trade cryptocurrencies and mirror assets

[MathWallet](#): multi-platform crypto wallet for Terra assets

[Ledger Nano X/S](#): hardware wallet by the Ledger team

[Oxis](#): non-custodial wallet with fiat to crypto on and offramps & trading functionality

[ZenGo](#): multi-asset wallet, optimized for mobile

[XDEFI](#): cross-chain wallet (Chrome) extension. Handle Ethereum, Thorchain, Poligon, Bitcoin, BSC, Terra...
